Profile

I have held positions in a number of companies specializing in IT services as a systems administrator, tester and programmer. My practical experience includes systems administration, support, software development, testing, specifications, security policy and people management.

Experience

Operations Manager, Kelly OCG (Intel); Folsom, CA – Feb 2017 - Present

  - Responsible for a team of engineers and technicians providing support for Intel's VPG 3D Graphics Group.
  - Create and maintain Python, BASH, and PowerShell scripts for automation solutions
  - Participate in ongoing collaborative development, improvement, implementation and adoption of automation test solutions, test data and test result reporting
  - Create, document, maintain, extend and execute automation test coverage in close coordination with developers and other SQA team members
  - Work as part of the team to develop processes for effective monitoring and reporting of automation test cycle results
  - Communicate and support all project-related information in a timely and professional manner as dictated by team need and testing processes

CTO, Packs For Cold Backs INC. 501(c)3 – November 2015 - Present

Created and manage the website https://www.packsforcoldbacks.org. Manage email, and all other Packs For Cold Backs communications. Advise and assist with all technical aspects of the organization.
  - Google Cloud
  - Microsoft Office 365

Senior IT Consultant, Entrust IT Solutions; Carmichael, CA – October 2012 - May 2016

  - Responsible for 1200 nodes monitoring with N-able, Cacti, Nagios, and other network monitoring services
  - Keep an inventory of clients machines for updates, repairs, and replacement
  - Install, maintain and upgrade the computing and networking systems, applications, hardware, software and network infrastructure
  - Audit security logs, reports and authentication features to ensure security
  - Configuring new workstations, setting up user accounts, and allocating mass storage space
  - Troubleshooting, planning for, and responding to service outages and other problems
  - Virtualize systems, create cloud redundancy, maintain and manage backups
  - Create weekly and monthly reports of, security, inventory, hardware, patch, backup, and licensing for each client
